Industry in Indonesia
for IATF Certification

BACKGROUND

Rapidly developing technological advances have resulted in rapid business developments and changes and are full of various uncertainties with increasingly fierce competition. For this reason, a business must be able to adapt itself to various developments that occur. Companies need ISO 9001 to establish a quality management system that complies with international standards, which improves operational efficiency, customer satisfaction, and business partner trust, as well as providing competitive advantages and support for innovation and business sustainability in the future. Here are the:

- Improvement in Quality and Consistency
- Increased customer satisfaction
- Operational Efficiency and Effectiveness
- Competitive Advantages and Partner Trust
- Increased innovation

BACKGROUND

In addition to meeting business demands in the automotive industry, businesses are also required to think about environmental issues. How does the business create company operations that think about Sustainable Development for the needs of the present generation without sacrificing the ability of future generations to be able to meet their needs, due to environmental damage or depleted resources. Therefore, in operating the company, businesses are required to comply with the international standard ISO 14001:2015 Environmental Management System.

ISO 9001:2015

It can be used in any kind of business or industry ISO 9001:2015 is an international standard requirement more general:

- Make products or produce services as desired customers
- Improve company performance
- Increase customer satisfaction

The Basics of ISO 9001:2015

Sentral Sistem Approach Logical Based Thinking

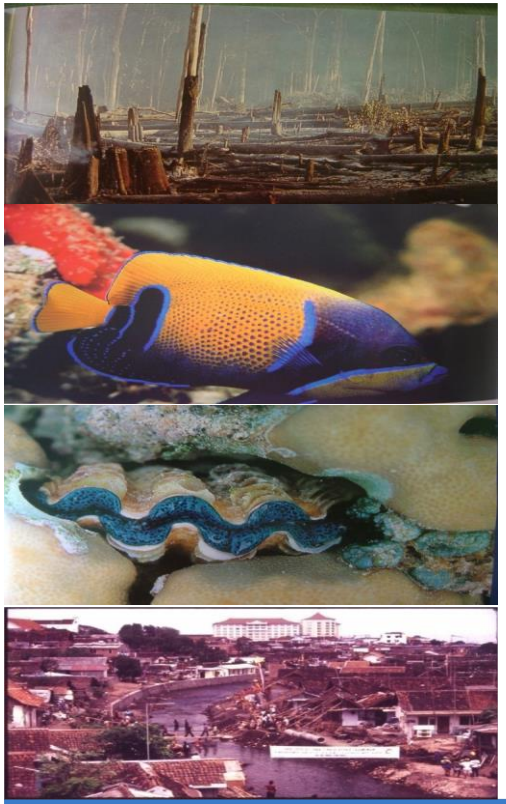

1. **Improvements in the PDCA Approach**
   Strengthening in the Planning
2. **Risk based Thinking Mindset**
   From Detection and Corrective Action to Prevention
3. **Process Approach**
   Minimize Departmental Ego, Focus on Process
4. **Commitment is Not Enough, There Must Be Leadership !!**
5. **The Measurement of System Effectiveness is → Performance Improvement**

ISO 9001:2015 series 1/Rev01 © Copyright Sentral Sistem, Mar 2016

ISO 14001:2015

ISO 14001:2015 is an international standard for Environmental Management Systems, with a systematic approach to environmental management that provides organizations with a framework for protecting the environment and responding to changes in environmental conditions in balancing socio-economic needs. Understanding ISO 14001:2015 is not enough to just understand the interpretation of the requirements of the articles in ISO 14001:2015, but we need to understand the PURPOSE or PURPOSE of these requirements and their RELATIONSHIP to COMPANY ENVIRONMENTAL PERFORMANCE In this way, the Company can implement ISO 14001:2015 which is not just a certificate, but can provide real benefits for improving the company's environmental performance.

ENVIRONMENTAL ISSUES & PROBLEMS

POLLUTION

Exploitation of Natural Resources

ENVIRONMENTAL DAMAGE

DISRUPTION OF NATURAL BALANCE

WHY INTEGRATION...?

Currently, businesses are required to meet various international standards, in order to be able to compete globally according to international standards, so that wherever the business is located, the products or services produced are the same, here are examples of some of the demands:

Business: matters related to the company's profit - loss, income and expenses (efficiency)

Quality: according to customer expectations (products and services)

Occupational Health and Safety (OHS): all employees and people in the environment the company and its surroundings are healthy and safe

Environment: Sustainable Development: The development to meet the needs of generations now WITHOUT COMPROMISING future generations' ability to comply with their needs, due to environmental damage or depleted resources

WHY INTEGRATION...?

The increasing number of these demands, the company's method of implementing Management Systems in companies is Integration. The High-Level Structure was created to become a reference for synchronization between Management Systems and various standards, such a ISO 9001, IATF 16949, ISO 45001, ISO 14001, ISO 55001, ISO 27001, ISO 22301, and etc. This facilitates the integration process of several Management Systems implemented by the company. Likewise with the Integration Concept of ISO 9001:2015 and ISO 14001:2015, what we offer aims to:

- ✓ Reducing conflict between standards. Quality first vs Safety first vs Environment first vs Business first
- ✓ Overall mindset, focus on process and each process must produce BMK3L (Business–Quality–K3–Environmental) performance according to the target
- ✓ Employees are only guided by 1 system, the Company System which already contains BMK3L
- ✓ Reduce duplication of work, such as Quality Audit OHS Audit, Environmental Audit, ISO 9001 Management IATF Management Review, 45001 Management Review, 14001 Management Review, Business Performance Meeting, etc.
